25X1	5.	a tube about 20 cm long and h to 5 cm in diameter below the aft end of the fuselage. Previously the sleeve target was spread out before the take-off of the towing plane, and in this way was frequently damaged at take-offs. Recently, it has been observed that sleeve targets were stowed in bomb bays and released only after the take-off. The tow line for the sleeve target was seen outside of bomb-bay doors when the planes took off.	
	. 6.	Regarding the position of Colonel Zoldatov, Doldatov, in negotiation with derman authorities, in negotiations between the German construction headquarters and troop units, in blasting operations connected with the construction of aircraft revetments and at the inspection of the installation by General Chuikov acted as the airfield commandant. However, it is believed possible that he was not the commanding officer of the air unit stationed at the field but of the personnel of the ground unit. Tajor Lenkin was known to be the supply officer of the field. He was last observed in this capacity when the seven single story temporary buildings in the barracks camp were turned over to him.	`25X1
25X1	7.	Activities observed during the period from 21 totober through 1 November included:	
		Jetween 7 and 3 a.m. on 21 (ctober 1952, thirteen jet bombers refuelled from four tank trucks with trailers. The tank trucks proceeded wice to each bomber. Subsequently, two starter carriages proceeded to a point of 5 to 6 meters forward of the right wing.	
25X1 25X1		Shortly afterwards the jet engines were started. At 8:15 a.m., UIL-28 took off and landed at 8:10 a.m. IL-28 took off at 8:15 a.m. and landed again at 9:25 a.m. Until noon, 2h take-offs and landings were practiced by jet bombers, which only circled over the field. Flying discontinued about 2:30 p.m. It was raining. The ceiling was at about 500 meters, and visibility was h,000 meters.	25X <sup>-</sup>
		22 Cctober. Fourteon jet bembers without auxiliary fuel tanks were counted at the hardstand south of the runway.	
ILLEGIB		24 Cotober. Fourteen jet bombers were observed. The weather was	
25X1 25X1		took off at 10:05 and 10:07 a.m. respectively. The two planes circled three times over the field at an altitude of about	25X1
25X1		500 moters and then landed individually at 11:40 a.m. At 12:05 p.m., II-20 took off; this	25X <sup>2</sup>
2		plane was not fitted with a bottom gondola. The plane landed again at 1:10 p.m. At 2 p.m., UIL-28 took off and landed again 30 minutes later. The landing plane approached the runway in straight line from the east, turned to the northwest when it had reached the approach lane and flew as far as the point about 500 meters of the end of the runway, when it turned to the south at an angle of about 120 degrees, made another angle of 90 degrees to the west at end of the runway and then landed. Thying discontinued at 2:30 p.m.	25X1
		25 October. Sixteen jet bombers parked in groups of 6 - 6 - 4 planes were observed at the hardstand south of the runway.	
		29 (ctober. Between 7:30 and 8:15 a.m., eight jet bombers refuelled from 3 tank trucks with trailers; the tank trucks approached the abscraft only once. There was a 10/10 overcast at the altitude of 150 peters and a strong southwesterly wind; it was raining, and visibility was about 3,000 meters. At 9 a.m., UIL-28 took off to circle/times over the field and larded again at 9:30 a.m	25X

		team the other aircraft. At 5 p.m., 16 jot bombers were observed at the installation.	
		ticed individual flying.	5X1 5X1
25X1		with two machine guns at the tail gun position. From 11:15 to 11:50 a.m., 13-23s were observed flying. At 12:15 p.m., two IL-20s,	
23/1		which were not stationed at the field. landed. They took off again at	
		1:15 p.m. and landed after circling three times over the rield. Eighteen jet bombers were observed parked in groups of 5 - 6 - 6 - 1 at the hard-	
		stard south of the runway.	
	8.	At 10 a.m. on 2 Lovember, Four new starter carriages painted clive drab were unloaded at Grand vailoued station and taken to the field. The starter	
		were unleaded at Franc Fall thed station and taken to the field. The starter carriages had Four very small wheels with thick rubber tires.	
25X1	9.	Cn 2h October, the searchlights had been moved from Krausnick to a point about 600 meters cast of the village. A new radio	
		installation with a mast about 10 meters high was observed about 25 meturs	
		north of the Krausnick - Brand highway, about 300 meters distant from the Roue Schenke Inn. The anterna wast was braced by six wires each at the top	
			5X1
		apparate was section-	
25X1	1.	Comment. It appears doubtful that training and instrument flying	
		correct, it is believed that exceptional instrument take-offs were prac-	25X1
		ticed by very well trained pilets.	
25X1	2.	Corment. It is believed that UIL-20s carried crews of five for	
		training purposes on long distance flights.	
25X1	3.	Soviet construction headquarters in Lerder; Captain Pshinichni and	
		Major Olejnik are assigned to this headquarters: Major Mironenko is	
		inspector of Brand, lelzow and Cottbus airfields. On the basis of previous information it was believed that tank trucks had a capacity of 4,000 liters.	
25X1	•	The present report indicates that the tank truck	
5 E V 4		and its trailer had a capacity of 3,500 liters each.	
25X1	L.	Comment. The eighteen starter carriages coincide with the number of aircraft assigned to the bomber regiment in Brand.	
25X1	5.	NO.	
20/ I	٠.	Comment. The bombs probably were 100-kg bombs. Similar bombs were also observed in terneuchen.	
25X1	6.	Constent. The name observation was made in Justorbog.	FV4
